## WEEKLY MINING REPORT.

### New Developments in Tough Nut and Grand Central.

**Does Mining Pay?**  
We introduce our weekly report with the following pertinent article from the New York Daily Stock Report:

Ask California, with her 800,000 inhabitants and production of \$1,000,000,000 of gold since 1849. Ask San Francisco, with its 232,000 people, many of whom remember when their first houses were erected by the Argonauts, showing a growth in thirty-three years exceeding the capacity of the imagination to conceive of. Ask what would she be to-day had it not been for her gold mining.  
Has the discovery of the precious metals within her borders paid Colorado, the youngest of all the states, yet standing in the front rank of railroad building, whose coal and iron industries are rivaling those of the older states, and whose silver production takes first place in this or any other country. Ask Denver, the "Queen City of the West," whether mining has paid. Denver, with her 40,000 souls, all busy and happy, its buildings (erected by miners) rivaling those of the oldest cities of the East. Ask Louisville, "The City in the Clouds," with its 30,000 people, all engaged in swelling its silver output to over \$13,000,000 per year. Ask the numerous camps throughout the state that helped augment Colorado's billion production in 1881 to over \$13,000,000.  
Has it paid Nevada? Has Eureka's \$75,000,000 been devoted to that state? Has Comstock's \$300,000,000 failed to infuse new life and energy into that Mecca of glittering wealth?

So we might continue. As it paid Arizona, New Mexico, Utah, Idaho, Montana, Dakota? Has Nevada paid the nation? Does it pay to add \$3,000,000 annually to the enduring wealth of the nation? Has it paid to have the vast territory west of the Rocky mountains opened up to settlement, to have the railroad reach from the Missouri river to the Pacific ocean? Has it paid to have 2,000,000 hardy sons of toil people those wilds where only the Indian held sway a few years ago? Does it pay the government to receive \$1,000,000 per year for property that recently was inaccessible, and which would be today if it was not for the miner, whose going before made it an object for the nation to reach out and enjoy the benefits arising from the toil, and the railroad opened the way for the farmer and the tradesman, so that today that which ten years ago was a vast, unbroken wilderness, with the savage lurking behind every bush, is now a blooming garden, smiling forth its treasures to gladden the hearts of millions of toilers in the East, besides supplying the means to reduce our immense public debt. In view of these facts, can anyone ask: "Does mining pay?"

### Tombstone M. & H. Co.

This property is a constant surprise, not only to its owners, but to the public generally. One year ago there were times when its manager was in doubt where his week's supply of ore for the mills was to come from; but as work progressed from day to day, the ore bodies enlarged, and more than sufficient was forthcoming. Since then the finds have been so numerous and extensive that they can now see at least two years ahead, with a probability of many more beyond that limit, and this without any drawing upon the imagination.

A new and exceedingly rich find has been made in the Tough Nut northwest workings, shaft No. 6, from which over 200 tons of ore have been taken, of a grade above 200 ounces to the ton. The extent of this body can as yet only be conjectured, as it has steadily enlarged since first struck. At this point, not a bucket full of water is hoisted during the day, all that comes up being high grade ore. The old northwest workings, across the gulch, are also showing well. Work on the Combination mine (Good Enough), is not being pushed at the present time, and will not be until the air shaft, which is down 60 feet, makes connection with the old workings at this point. In the Good Enough main works they are sinking on ore from the 200 foot level, the ore being on the 100 ft wall.

WATER SIDE shows a continuation of the former gold developments, and bids fair to become one of the best mines of their system. Still sinking, following the ledge, which is vertical, down. Shipping the usual amount of ore to the mills which work up to their full capacity.

### Contention Consolidated.

The Flora Morrison shaft is down 80 feet below the 500 station. At 30 feet further down a station will be cut and drift run to connect with the 600 level, old works, when active developments will commence at that point. The grade of ore on the 400 level is still better than at last report, the car samples for the last week having shown a marked increase in value. It can be inferred that this means when we state that all the ore milled up to Nov. 1, 1881, being 35,016 tons, gave an average yield of \$69.00 per ton. The first year's work of 15,000 tons yielded \$80.93 per ton. The new tank has been filled with water from the Sulphurets, which is pronounced by good judges the best drinking water in Tombstone. The tank is lined with galvanized iron, and does not leak a drop.

**Girard.**  
Drifting north and south on ore, on the 150 foot level. From the 200 foot level they are raising up on ore to connect with the 150 foot level for air. Will commence stopping on the 200 as soon as this connection is made. Are now stopping on the 329 level, and the ore body looks well. Sinking an incline from the 329 level, following the ledge, which makes a good showing. The new tanks have been finished and painted, and will from this time on supply the mill and mine with water from this source. Everything at both mine and mill is running along smoothly, the mill being run upon the ore dump that accumulated during the development of the mine.

### Hua-hua Water Co.

Work laying the main will commence on Monday with a force of twenty-five men. The pipe will be laid from the west, or Hunchua end of the line. It is thought by Mr. McCoy, the general manager, that the pipe will be delivered as fast as it can be laid from this time forward. The reservoir near town is being pushed to completion in a rapid manner. We call on the east side is now up 12 feet, that on the north 10, and on the west 5, with a good beginning on the south. Another week will end the excavation when the work will advance more rapidly. This is a magnificent piece of work and as enduring as the everlasting hill in whose lap it is situated. Mr. J. L. Darrah who has had the work in charge has shown fine executive ability, and is deserving credit from the company for the manner in which he has looked after their interests.

### Grand Central.

The new shaft is down 15 feet below the 600 level and being pushed for the water regions below as fast as possible. A few feet further will undoubtedly solve the problem as to whether the water stands at a uniform level throughout this great fissure or not. On the 300 level, old works, west of the great ore body that has been so productive, at a point 100 feet distant, another large ledge has been discovered, richer, even, than the main body. Car samples range from \$100 to \$130 per ton. The vein is from 4 to 6 feet wide. Work on the 600 level is being pushed in good looking ledge matter, with some fair grade ore. The slopes are looking the same as at last report.

### Woronoco (San Diego) Mining Co.

Stopped work on the 120 level early in the week. Commenced stopping on south drift on 200 level, and sacking the high grade ore. The ledge in north drift on this level holds the same width and is looking finely. Crosscut is still in quartzite. Started new levels from the shaft at 350 feet, drifting north and south.

### Humboldt Copper, Turquoise.

This is a property belonging to Mr. C. Billeke and F. Roper, upon which work is now being done. It is situated in the Turquoise district, not far from the Elgin mine. The ore is carbonate and red oxide assaying 48 per cent copper and \$20 silver. There are two shafts on the ledge, one 20 and the other 5 feet deep, with one drift which is all in ore. Mr. Roper is now at the mine superintending the work of development.

### Bunker Hill.

Since our last report the incline upraise from the 80 foot level has been completed, and the slide is now being put in. When this is done a station will be cut on the 180 foot level and drifting begin to the south, on the ledge. From the indications at this point a large body of ore may be expected at no great distance from the shaft.

### Sulphurets.

The draft on this mine for water for the Girard and Contention companies does not lower the water a fraction of an inch. The estimates for the new pumping machinery have not yet been accepted by the company.

### Eagle and Ironclad.

Mr. Thompson, who has a working bond on this property for a Kansas City company, will start work on Monday next. He took out ore from the vein in the incline, yesterday, that was filled with green horn silver that would assay way up in the hundreds. The prospects for a good mine in this property is equal to anything in that section of the district.

### Ingersoll.

The contract for working the ore has not yet been signed. The accumulation of rich ore continues at the average rate per week. There is now about 2,500 tons on the dump with a gross value of \$250,000.

### Vizina.

Sinking main shaft in good working rock. The drifts and slopes continue to look well and yield their usual amount of ore which goes forward to the Boston mill.

### Side-Wheel.

A contract has been let by Mr. B. F. Culver for sinking 100 feet of shaft on the vein. The work already done shows a 3 foot ledge of good manganese ore.

### Contact.

The development work thus far maintains the high estimate that has been placed upon this property.

### Old Grand.

Sinking continues; now down 175 feet. Ore upon the foot-wall improving. Ledge strong and well defined.

### Another Episode in the Gilded Age.

William Herring, Esq., made application to the District Court in Tucson, this week, for an order to show cause why the writ of restitution heretofore issued under the judgment in the case of Field vs. Gray and others should not be withdrawn and set aside, and the clerk of the court be directed in issuing any further or other writ upon said judgment shall conform the same to the judgment so as to make it operative against the defendants in said action, and persons claiming or holding under them at the time of the commencement of the action.

The order is returnable on Thursday next at Tucson, where the question is

to be argued, and in the meantime the court has ordered all writs to be stayed, the point being made that the clerk of the court of Pima county has exceeded his authority, and that the power of the court at all times exists to correct its own process upon motion. This question will at last be brought up on its true merits, and will be presented to the court with that legal skill and ability that will bring the matter to a decisive and final issue.

### CALISHER'S EXAMINATION.

Held to Appear Before the Grand Jury.

The examination of David Calisher was continued before Judge Wallace this morning at 10 o'clock.

After our report closed yesterday L. F. Blackburn testified to being at the Bird Cage theater and to seeing Calisher off on the morning of the fire, and that he left the theater about ten or fifteen minutes before the alarm of fire, and that Calisher could not have left for a half or three quarters of an hour before witness left without he (witness) knowing it. Mr. Blackburn also testified that he did not smell coal oil entering the store. The court then adjourned. This morning the session was spent in arguing the case. District Attorney Price opening for the prosecution, and was followed by Ben Goodrich, Esq., in behalf of the defense.

Judge Lewis, this afternoon, continued the argument for the defendant, and was replied to by Attorney Price who closed the case, and it was given to the court.

Judge Wallace, in rendering his judgment, said that the case had been carefully examined and argued on both sides; that the counsel, as well as the court, had taken great interest in the matter and he considered that the case had been presented. The court considered that the property belonged to the defendant, that the fire was of an incendiary nature, and that there was sufficient reason why the prisoner should be held to appear before the grand jury, as the one guilty of the crime; that should he order his discharge he would be failing to perform his duty as a magistrate. D. Calisher was accordingly held in the sum of \$1,000 bail to answer before the next grand jury.

### LOCAL SPLENDORS.

Don't let up on sprinkling the streets. This is one of the things for which people get their quid pro quo.

Mr. A. M. Womble was the recipient of a serenade at the Cosmopolitan hotel last night.

Mr. M. E. Joyce will give a grand reception at the Oriental at 12 o'clock tomorrow. A cordial invitation is extended to his many friends.

The western mail has been arriving on time for the last few days.

JOSEPH BEAKE, engineer at the Flora Morrison, is expected home to-night.

A LARGE new stock of dry goods has just been received by the firm of M. Rosendorf. Goods are arriving daily and the proprietor is too busy to write an "ad."

POLICEMAN POYNOST arrested Richard Quarty yesterday for being drunk and disorderly. On being arraigned before Judge Wallace, the prisoner was fined \$5 and costs, in default of which he was committed to jail.

JOHN SCOTTY got on a "tear," and was arrested by officer Kinney, who brought him before the police judge, and he was fined \$5 and costs, but being "short" will take five days in the city jail.

The Grand Restaurant will open in a grand style tomorrow (Sunday), at 12 o'clock, noon. The dining hall is spacious, the dishes served will be the very daintiest, and in fact every appointment will be first-class, hence if you do not get a splendid dinner it will be because the Grand was not patronized.

A RECEPTION will be tendered Bishop Dunlop by the ladies and gentlemen of the Episcopal church, Monday evening at 7 o'clock, at the District court room on Fremont street. A cordial invitation is extended to the many friends of the Bishop as well as our citizens in general, to be present.

The exercises of the public schools yesterday afternoon were particularly interesting. All four departments assembled in Mrs. Stanton's room, that being the largest. A number of friends and patrons of the schools were present. The exercises consisted of biographical sketches by the pupils of the principal's room. Among these "The Life of Garfield," by Eugene Alexander; "Biography of Lafayette," by Jennie Whitcomb, and "Autobiographies" by Gertrude Howe and Adella Upinger were specially good. The compositions of Walter Fulkerson and Gertrude Johnson, pupils of the third grade, showed much application for such young students. The children of the lower grades sang "Clickety Click" very well, and also joined in the songs sung by the whole school.

### Answers to Correspondents.

**ANGLISE.**—The name of the young mining superintendent who tried to make a deal in photographs is withheld for the present. When he appears openly as a candidate for territorial delegate, we will furnish you with his name. Till then, curb your impatience. In the meantime, however, you may call him Two-bit Jack.

**BLACKSTONE.**—No, we would not advise you to sit that scandal to the bottom, for it might be proven on you. Quantum sup or Verdant sap, as we say in Latin, or something like that.

**SUPERINTENDENT.**—The assay of the Nugget editor will not be republished, as it was inaccurate. A more critical analysis has developed the fact that the greater percentage consists of what Pete Kitchen got in Sonora.

**GOV. TRIFLE.** told the oath of office to day before Chief Justice French. He is now governor of the territory of Arizona. —Prescott Mizer, March 8.

## Proceedings of the Executive Committee of the Tombstone Republican Club.

The committee met in the law office of Judge Spicer last evening, and was called to order by the chairman, A. O. Wallace. Webster Street acting as secretary.

On motion it was ordered that the committee appointed at the last meeting to procure a room for the club, be instructed to obtain a room for the meeting of April 8th, and defer action in regard to a club room until after that date.

It was ordered that a meeting of this club be called for March 23d, to transact such business as may come before the committee.

### The Sewerage System.

**EDITOR EPITAPH.**—In your issue of the 9th instant the public is informed that a committee of the city council is to report at its next regular meeting on a system of sewerage for the city of Tombstone; and you urge that speedy steps be taken to have the sewers laid.

It is to be hoped that the city council will not act with precipitation. The report should be given to the public and no action taken until whatever proposition is made can be fairly discussed. Our situation is peculiar, and a system of sewerage that would be suitable in the neighborhood of great arterial streams would be dangerous, expensive and ineffective here.

J. G. M.

### LOCAL PERSONALS.

Judge H. C. Dibble has gone down to Tucson for a few days.

L. W. Myers, Esq., of Contention City, is registered at Brown's.

W. K. Watson is registered at the Cosmopolitan from Sonora.

D. F. J. Fisk, Esq., of Tucson, is at Brown's.

### THE "NUGGET" ARRAIGNED.

The Society of Jesus Defended from an Unwarranted Attack.

**EDITOR EPITAPH.**—In yesterday's edition of the Nugget appears what purports to be a communication to that paper. It is without the signature of the sender, but that is unnecessary, as the Nugget fathers it. I am not conversant with the history of San Francisco, but I am with that of the Society of Jesus, called Jesuits, and it is some time since I have seen so malignant a tissue of falsehoods in public print, and I feel that I would be dead to every feeling of manhood were I to permit it to go unchallenged.

I do not deny that the article has some element of truth in its composition; that the facts regarding the relief are as stated, I am willing to believe. But the other matter in the article could only have originated in the fertile imagination of an unformed and vindictive bigot, and I assert that the conclusion deduced from his mixture of truth and fiction is a damnable lie, and only calculated to appeal to the prejudices of the ignorant.

When the writer of the article states that the Mexicans are ignorant and superstitious, I cannot gainsay it, for I have never lived among them. If they are ignorant they are certainly superstitious, for the two always go hand in hand. It would seem that they are both, otherwise they could never have banished from their boundaries one of the noblest sets of men ever banded together, whose Godlike deeds, recorded in the pages of the history of his country, will stand monumental pyramids to their valor and self-sacrifice, long after their maligner shall have entered a forgotten grave. A band of men of whom Macaulay, who certainly cannot be accused of partiality to Catholicism, in speaking of the schools founded by them, (as nearly as I can quote to his words from memory) says: "Were it not for these institutions of learning scattered here and there among the huts of a miserable peasantry, and the castles of a forlorn aristocracy, European society would have consisted merely of beasts of burden and beasts of prey."

## Hotel Arrivals.

**BROWN'S.**  
CHAS. BROWN, Proprietor.  
D. F. J. Fisk, Tucson; S. W. Hughes, Contention; A. B. Kerr, Bowie Station; T. B. Bayman, S. S. Sample, S. S. Bryant, H. McCrumm, San Francisco.

### COSMOPOLITAN.

C. BLACK, Proprietor.  
Robert Aitken, San Francisco; Frank S. Proctor, A. Mathers, Empire Ranch; W. K. Watson, Sonora; Thomas Forth, Wm. Forth, Oakland; A. B. Alexander, R. C. Calmley, John White, Los Angeles; Geo. Lampher, Texas; Louis E. Scholl, Tucson; Jacob G. Wall, Russell.

Mr. Frank L. Proctor and A. Mathers, of Empire Ranch, are stopping at the Cosmopolitan.

It is learned that a party is to be given by a number of young ladies, assisted by the gentlemen, to Messrs. Batterman and Elliot, Monday night, at the Head Center mine. These gentlemen are about to leave for San Francisco and a good "send off" is in order.

The following unclaimed telegrams are at the Western Union office: Jas. E. Hussey, Joe McDonald, W. G. Stegman, C. H. Munn.

### THE OLD DOMINION AGAIN.

About the most amusing reading through our eastern exchanges is that about the Old Dominion Copper company. In order that EPITAPH readers may keep posted on this wonderful (!) property that is going to eclipse the Calumet and Hecla in production, we subjoin the following from the New York Daily Stockholder, which shows the last phase of the programme as mapped out by the president of the company at their annual meeting.

At the annual meeting of the stockholders of the Old Dominion Copper Mining company, held yesterday, the following trustees were elected: Geo. W. Dunn, C. E. Brooks, S. M. Hamilton, Geo. W. Hughes, and James Bailey. Geo. W. Dunn was re-elected president, and C. E. Brooks secretary and treasurer. President Dunn submitted the following report: "The unforeseen and unavoidable obstacles the company have been obliged to contend with, in the shape of swollen rivers, Indian outbreaks, and delays in transportation, have been surmounted. The machinery and smelting furnaces have been transported from San Francisco, and successfully erected at the furnace site near our New York mine, after a delay of nearly six months, from the above causes. Ample supplies of coke, charcoal and wood have been provided, and arrangements have been perfected to insure a regular supply of these articles when wanted. William Davis, a practical copper smelter and refiner, highly indorsed by Messrs. Pope, Cole & Co., the owners of the Baltimore Copper works, has been engaged to take charge and operate our smelting furnaces. It has not been considered wise to erect more than two 30-ton furnaces at first. When we are thoroughly satisfied that these furnaces can produce the results we require, two more furnaces of same capacity will be erected at the Old Dominion and Keystone mines. Additional furnaces will be erected as fast as the mines can be opened, so as to supply them regularly and continually. The required proceedings necessary to produce United States patents for the company's property are progressing satisfactorily. The suggestion of the superintendent as to the erection of suitable works to save the gold and silver contained in ores will undoubtedly be adopted, after thorough tests of the various methods of concentration have been made. The company has been under no expense for salary for either president, secretary and treasurer, or superintendent. It is expected the company will be fairly established on a dividend paying basis by the 15th inst, at which time bullion shipments will be commenced. "Our mines are improving as the developments progress and depth is attained. All signs point to a prosperous business for us during the coming year. Large coal fields have been found about 45 miles south of Globe. The coal is of excellent quality for coaling purposes. A charter has been granted for a railroad which will pass these coal fields and connect with the Southern Pacific railroad at Tucson. This will greatly enhance the value of our property. It will enable us to lay coke at the mines for one-tenth of the present cost, and give us much cheaper and quicker transportation for our product." The treasurer's report shows the receipts for the past year to have been \$136,712.31, and the expenditure \$109,147.48.

### Cochise County Records.

The following instruments have been filed for record with the county recorder:

### LOCATIONS.

Lubain Parais, Adile, Huachuca district.  
J. Nixon Mason, Black Warrior, Trinidad, Turquoise district.

Cachise M. & M. Co., Wallace, Merry, Victoria, Noble Duke, Das Gabezas district.

Cachise M. & M. Co., Kinchala, Teris district.

A. S. Ashby, Olive and North Star, Teris district.

### ABANDONMENT OF CLAIM.

Joseph M. Stump.

### MILL SITE.

Lubain Parais, the Adile mill site, Huachuca district.

### APPOINTMENT AS ATTORNEY.

James Cunningham et al. to Godfrey Tribotet, to sell certain mines.

### DEEDS—MINES.

J. M. Stump to T. J. Drum, 1/4 Topsy, 1/4 John T. Bland to A. C. Ulickie, 1/2 Accident, \$500.

Alfred Eymard to J. M. T. Bland, 1/2 Accident, \$5.

### QUIT CLAIM DEED.

John J. Anderson et al. to Mrs. M. R. Berry, lots 22 and 23, block 45, \$500.

M. B. Clapp to Geo. G. Berry, parcel of land, 1000.

### HERE WASN'T MUCH IN THE NUGGET

this morning, on account of the editor being engaged in writing a poem on Spring.

It requires a full blooded hound to follow a "cold trail," so it is not singular that the EPITAPH don't get left.

Being a cur, of course the Nugget gets left.

VERY nearly Auntie—You go to school, Charley?—Charley—Yes, Auntie—You don't play the trumpet?—Charley—No; but I'm learnin' the pianer. —Judy.

## LATEST TELEGRAMS.

(Special Dispatches to the EPITAPH.)

### Congressional—In the Senate.

WASHINGTON, March 11.—The Senate's liquor bill was taken up and the vote stood: yeas 26; nays 24; being a party vote, except Maxey and Davis, of Illinois, who voted aye with the republicans. Mahone also voted aye. Morrill voted with the democrats pending the amendment. Bayard's amendment was lost by a party vote, yeas 24; nays 25. Cameron of Mississippi and Davis of Illinois, voted aye with the democrats.

The bill was then reported to the senate from the committee of the whole. The time within which the commission shall report is fixed at eighteen months.

The bill provides for the appointment of a commission of eleven persons, to hold office not exceeding two years, who shall investigate the alcoholic liquor traffic, its relations to the revenue, and taxation, and its general economic and criminal, moral and scientific aspects, in connection with pauperism, crime, social vice, public health and the general welfare, and they shall enquire into the principal results of license and prohibitory legislation. The commissioners are to serve without salary. The tariff bill was then taken up and informally laid aside as unfinished business for Monday. The senate then adjourned till Monday. It is understood that the sub-committee on ways and means have virtually agreed upon the bill reducing the internal revenue tax on whiskey and tobacco, and removing the tax entirely from a number of articles. The reduction in the revenue to be affected by the bill is estimated to be about \$70,000,000.

The bill then passed, yeas 33, nays 14. Kellogg, Jones of Nevada, Windom, Cameron of Mississippi, and Teller in favor of the bill and paired with Farley, Williams, Davis, of West Virginia, Jackson and Johnston, against. Brown paired with Sanders.

### The Star Routes in Court.

WASHINGTON, March 10.—Cobell and Miner this morning gave bail in \$5000 each on the star route cases. Col. Ingersoll came into court with his client, ex-Senator S. W. Dorsey. Bliss, counsel for the government, asked that bail for the appearance of S. W. Dorsey and J. W. Dorsey be fixed at \$10,000 in each case. In the case of Atterdell, he said the government would ask \$5000 surety. Ex-Senator Dorsey then offered J. W. Humphreys as his bondsman and he was accepted. On the name of Joe. W. Dorsey being called, Col. Ingersoll told the court that Dorsey was on his way here from New Mexico to furnish bail, and asked for time. The court granted the delay. Bail in the case of Rierdell was then fixed at \$5000. Ex-Assistant Postmaster General Thos. J. Brady offered N. W. Fitzgerald as surety, and he justified in the sum of \$20,000 as bondsman for the appearance of Brady.

### The N. Y. Tribune Endorses the Chinese Bill.

NEW YORK, March 11.—To-day's Tribune says the senate has passed the Chinese immigration bill. It has taken on an amendment or two, which perhaps might better have been left off. In commenting on the provision which prohibits the state courts from conferring citizenship on Chinese, says: It is suggested by the fact that Hop Sing, of this city, yesterday made a formal declaration before the proper officer, of his intention to become a citizen. It further says that it is to be regretted that any such bill as this is needed, but sometimes expediency is state-manship of the highest order.

### Strikers in Council.

OMAHA, Neb., March 10.—The labor unionists and mob held a big meeting to-night and determined to enforce, if possible, their established price of \$1.75 per day for common laborers. More serious trouble is expected. A strong military force will be here to-morrow. The ring-leaders are to be arrested, probably on a charge of conspiracy. Hot times are expected to-morrow. The authorities are determined to put down mob rule and settle the question for ever, and by blood, if necessary
